

Along with all the other upheavals in the market, the landscape for hedge funds changed dramatically in 2008. They were hit from all sides by market illiquidity, massive year-end redemptions, forced selling, restrictions on short sales, and the failures of prime brokers and counterparties. For clients where hedge funds are an appropriate investment, our strategy has been to use hedge fund of funds (FOFs) vehicles, providing broad diversification. Some thoughts on the current hedge fund environment:

1. The key to survival in the FOF industry has been to run a conservative business model. No or little leverage at the FOF level, avoiding underlying hedge funds that got into very illiquid investments (i.e., private equity deals), and relatively stricter redemption policies at the FOF level are components of running a more conservative model.

2. Consistent enforcement of sound due diligence policies is critical. In our opinion, the key issue with Madoff was not that the FOFs didn't know the due diligence standards or how to implement them but that they chose (for performance and financial incentives) to give him a pass. Those funds that gave him a pass demonstrate why it is so critical to never make exceptions to due diligence policies. The FOFs that can prove a solid and consistent process (by avoiding Madoff and other frauds) will survive and thrive.

3. Why invest in HFOFs now? The conservatively run HFOFs are in a good position to take advantage of the opportunities in the aftermath of the financial panic. There are a number of very talented hedge fund managers who positioned themselves very well for this environment. The surviving FOFs have and can continue to allocate to them. It is very difficult, if not impossible, for an individual with \$500K-\$1 million to allocate to hedge funds effectively to take advantage of these opportunities (in credit, distressed, arbitrage strategies) other than through FOFs, which provide the due diligence, the diversification, and the access. Access to top managers is easier for top tier FOFs thanks to the panic. Even managers who 'got it right' in the last year have faced redemptions because their investors needed liquidity from wherever they could get it. Minimums and fees have come down to attract assets at both FOF and underlying hedge funds.

The charts that follow show returns for two groups of hedge funds—absolute return and broadly diversified. As you can see on the charts, the median hedge fund in the two peer groups fell less than half as much as the S&P 500 over the past year (ended March 31). That downside protection results in five and seven year numbers that are significantly better than equity returns (with less volatility) and slightly less than bond returns. Given the current environment and the issues outlined above, hedge funds will bear close watching over the near future.

everything.

IMPORTANT DISCLOSURE INFORMATION

Hewins Financial Advisors, LLC, ("Hewins") and Wipfli Hewins Investment Advisors, LLC are SEC-registered Investment Advisors.

Investment Advice:

The reader should not assume that any discussion or information contained in this article serves as a recommendation either for or against investment in a Hedge Fund of Funds. Nor does this article serve as the receipt of, or as a substitute for, personalized investment or legal advice from Hewins. To the extent that a reader has questions regarding the applicability of any specific issue discussed to his/her individual situation, he/she is encouraged to consult with Hewins or the advisor of his/her choosing.

Relationship of Past Performance to Future Expectations:

Past performance may not be indicative of future results. Therefore, no current or prospective client should assume that future performance will be profitable, nor will it equal performance results reflected in this letter.

Performance Calculations:

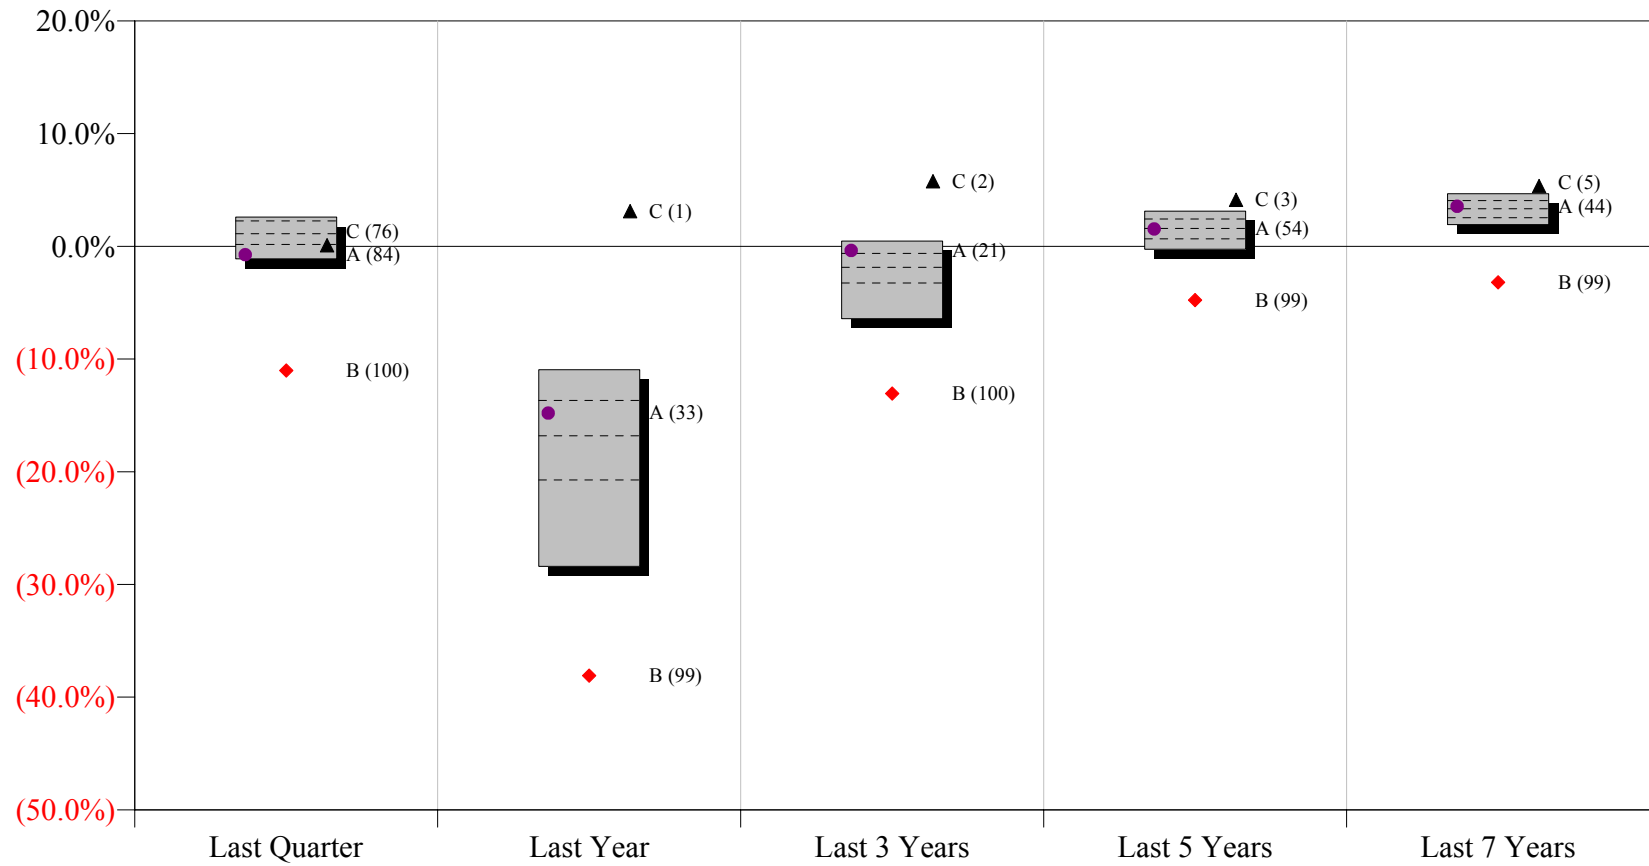

The performance results have been compiled solely by Hewins utilizing data from Callan Associates, Inc. They are unaudited, and have not been independently verified. Hewins also maintains all information supporting the performance results in accordance with regulatory requirements. The historical performance results of the indices do not reflect the deduction of transaction and custodial charges, nor the deduction of investment management fees, the incurrence of which would have the effect of decreasing the indicated historical performance results. The performance results do not reflect any corresponding impact of taxes on investment returns.

Additional Information:

Information pertaining to Hewins' advisory operations, services, and fees is set forth in Hewins' current disclosure statement, a copy of which is available upon request. In the event that there should be a change in a client's investment objectives or financial situation, he/she is encouraged to advise Hufford immediately.
